Write a 10 page paper (double spaced) on web-based application development using back-end databases. Discuss the advantages and disadvantages of the 2-tier vs. 3-tier application development and specifically look at one of the following tools:

MySQL/PHP
MySQL/ASP
SQL-Server/ASP
Oracle

What to hand in:

- Cover page with paper title, source, date, etc., your name, course # and name, assignment #, date, etc.
- Table of contents
- Introduction
- Body/Discussion
- Conclusion
- References (Use at least 3 sources)

Be ready to lead a discussion on the topic of your paper. I may call upon you to initiate and/or lead the discussion.
