

Sample Programs demonstrating Console Input and Output

Problem: Write a program that accepts two numbers as input and displays the subtraction of Number 2 from Number 1

Sample input and output

Number 1: 30

Number 2: 100

Output: -70

Solutions: [C++](#), [Java](#), [Node.js](#), [Python](#), and [C#](#) solutions are provided here to illustrate that your submitted programs must support console (standard) input and output and follow the instructions specified in the problem description.
